Armando Fox, Steven D. Gribble, Yatin Chawathe, Eric A. Brewer, Paul Gauthier

October 1997 **ACM SIGOPS Operating Systems Review , Proceedings of the sixteenth ACM symposium on Operating systems principles SOSP '97**, Volume 31 Issue 5

**Publisher:** ACM Press

Full text available: pdf(2.42 MB)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

2 [Multimedia authoring: Linking multimedia presentations with their symbolic source](#)

[documents: algorithm and applications](#)

Berna Erol, Jonathan J. Hull, Dar-Shyang Lee

November 2003 **Proceedings of the eleventh ACM international conference on Multimedia**

**Publisher:** ACM Press

Full text available: pdf(472.17 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

An algorithm is presented that automatically matches images of presentation slides to the symbolic source file (e.g., PowerPoint™ or Acrobat™) from which they were generated. The images are captured either by tapping the video output from a laptop connected to a projector or by taking a picture of what's displayed on the screen in a conference room. The matching algorithm extracts features from the image data, including OCR output, edges, projection profile and layout and determine ...

3 [Fast detection of communication patterns in distributed executions](#)

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

**Publisher:** IBM Press

Full text available: pdf(4.21 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with th

desired overview of the application. In our experience, such tools display repeated occurrences non-trivial commun ...

#### 4 Image Retrieval from the World Wide Web: Issues, Techniques, and Systems

M. L. Kherfi, D. Ziou, A. Bernardi

March 2004 **ACM Computing Surveys (CSUR)**, Volume 36 Issue 1

**Publisher:** ACM Press

Full text available: pdf(294.13 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

With the explosive growth of the World Wide Web, the public is gaining access to massive amounts of information. However, locating needed and relevant information remains a difficult task, whether the information is textual or visual. Text search engines have existed for some years now and have achieved a certain degree of success. However, despite the large number of images available on the Web, image search engines are still rare. In this article, we show that in order to allow people to profit ...

**Keywords:** Image-retrieval, World Wide Web, crawling, feature extraction and selection, indexing, relevance feedback, search, similarity

#### 5 Shape-based retrieval and analysis of 3D models

Thomas Funkhouser, Michael Kazhdan

August 2004 **Proceedings of the conference on SIGGRAPH 2004 course notes GRAPH '04**

**Publisher:** ACM Press

Full text available: pdf(12.56 MB)

Additional Information: [full citation](#), [abstract](#)

Large repositories of 3D data are rapidly becoming available in several fields, including mechanical CAD, molecular biology, and computer graphics. As the number of 3D models grows, there is an increasing need for computer algorithms to help people find the interesting ones and discover relationships between them. Unfortunately, traditional text-based search techniques are not always effective for 3D models, especially when queries are geometric in nature (e.g., find me objects that fit into this ...

#### 6 The architecture of robust publishing systems

Marc Waldman, Aviel D. Rubin, Lorrie Faith Cranor

November 2001 **ACM Transactions on Internet Technology (TOIT)**, Volume 1 Issue 2

**Publisher:** ACM Press

Full text available: pdf(680.21 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The Internet in its present form does not protect content from censorship. It is straightforward to trace any document back to a specific Web server, and usually directly to an individual. As we discuss below, there are valid reasons for publishing a document in a censorship-resistant manner. Unfortunately, few tools exist that facilitate this form of publishing. We describe the architecture of robust systems for publishing content on the Web. The discussion is in the context of Publius, at that ...

**Keywords:** Censorship resistance, Web publishing

#### 7 Requirements for distributed authoring and versioning on the World Wide Web

J. A. Slein, F. Vitali, E. J. Whitehead, D. G. Durand

March 1997 **StandardView**, Volume 5 Issue 1

**Publisher:** ACM Press

Full text available: pdf(96.62 KB)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

8 Chimera: hypermedia for heterogeneous software development environments

Kenneth M. Anderson, Richard N. Taylor, E. James Whitehead

July 2000 **ACM Transactions on Information Systems (TOIS)**, Volume 18 Issue 3

**Publisher:** ACM Press

Full text available: pdf(864.32 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Emerging software development environments are characterized by heterogeneity: they are composed of diverse object stores, user interfaces, and tools. This paper presents an approach providing hypermedia services in this heterogeneous setting. Central notions of the approach include the following: anchors are established with respect to interactive views of objects, rather than the objects themselves; composable, n-ary links can be established between a ...

**Keywords:** heterogeneous hypermedia, hypermedia system architectures, link servers, open hypermedia systems, software development environments

9 A personal digital store

Gordon Bell

January 2001 **Communications of the ACM**, Volume 44 Issue 1

**Publisher:** ACM Press

Full text available: pdf(289.88 KB) html(33.91 KB)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

10 Microsoft TerraServer: a spatial data warehouse

Tom Barclay, Jim Gray, Don Slutz

May 2000 **ACM SIGMOD Record , Proceedings of the 2000 ACM SIGMOD international conference on Management of data SIGMOD '00**, Volume 29 Issue 2

**Publisher:** ACM Press

Full text available: pdf(410.74 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Microsoft® TerraServer stores aerial, satellite, and topographic images of the earth in a SQL database available via the Internet. It is the world's largest online atlas, combining eight teraby of image data from the United States Geological Survey (USGS) and SPIN-2. Internet browsers provide intuitive spatial and text interfaces to the data. Users need no special hardware, software or knowledge to locate and browse imagery. This paper describes how terabytes of "Internet unfrie ...

**Keywords:** VLDB, geo-spatial, image databases, internet

11 WebExpress: a client/intercept based system for optimizing Web browsing in a wireless environment

Barron C. Housel, George Samaras, David B. Lindquist

December 1998 **Mobile Networks and Applications**, Volume 3 Issue 4

**Publisher:** Kluwer Academic Publishers

Full text available: pdf(338.35 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper describes an application model and software technology that makes it possible to run World Wide Web applications in wide area wireless networks. Web technology in conjunction with today's mobile devices (e.g., laptops, notebooks, personal digital assistants) and the emerging wireless technologies (e.g., digital cellular, packet radio, CDPD) offer the potential for unprecedented access to data and applications by mobile workers. Yet, the limited bandwidth, high latency, high cost, ...

12 Query Language for Semantic Web: RQL: a declarative query language for RDF

 Gregory Karvounarakis, Sofia Alexaki, Vassilis Christophides, Dimitris Plexousakis, Michel Scholl  
May 2002 **Proceedings of the 11th international conference on World Wide Web**

**Publisher:** ACM Press

Full text available:  pdf(352.14 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citings](#), [index terms](#)

X Real-scale Semantic Web applications, such as Knowledge Portals and E-Marketplaces, require the management of large volumes of metadata, i.e., information describing the available Web content and services. Better knowledge about their meaning, usage, accessibility or quality will considerably facilitate an automated processing of Web resources. The Resource Description Framework (RDF) enables the creation and exchange of metadata as normal Web data. Although voluminous RDF descriptions are already ...

13 Information retrieval on the web

 Mei Kobayashi, Koichi Takeda  
June 2000 **ACM Computing Surveys (CSUR)**, Volume 32 Issue 2

**Publisher:** ACM Press

Full text available:  pdf(213.89 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citings](#), [index terms](#)

In this paper we review studies of the growth of the Internet and technologies that are useful for information search and retrieval on the Web. We present data on the Internet from several different sources, e.g., current as well as projected number of users, hosts, and Web sites. Although numerical figures vary, overall trends cited by the sources are consistent and point to exponential growth in the past and in the coming decade. Hence it is not surprising that about 85% of Internet users ...

**Keywords:** Internet, World Wide Web, clustering, indexing, information retrieval, knowledge management, search engine

14 A streamlined system for building online presentation archives using SMIL

 Darren James, Jane Hunter  
December 2000 **Proceedings of the Australasian conference on Computing education ACSE '00**

**Publisher:** ACM Press

Full text available:  pdf(725.76 KB) Additional Information: [full citation](#), [abstract](#), [references](#)

✓ The demand for and expectation of ubiquitous access to multimedia online learning resources are much higher amongst computer science students than in other fields of study. Previous systems providing internet access to digital video or audio recordings of lectures have been disappointing or ineffective as a learning experience or excessively complex and time-consuming from the educator's point of view. This paper describes a new approach to building an online presentation archive of lectures, ...

**Keywords:** SMIL, flexible delivery, metadata, online presentations, video

15 Interacting in chaos

 Dan R. Olsen  
September 1999 **interactions**, Volume 6 Issue 5

**Publisher:** ACM Press

Full text available:  pdf(587.03 KB)  html(50.47 KB) Additional Information: [full citation](#), [references](#), [citings](#), [index terms](#)

16 Playing experience: From remote media immersion to Distributed Immersive Performance

A. A. Sawchuk, E. Chew, R. Zimmermann, C. Papadopoulos, C. Kyriakakis

November 2003 **Proceedings of the 2003 ACM SIGMM workshop on Experiential telepresence**

**Publisher:** ACM Press

Full text available: pdf(378.71 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We present the architecture, technology and experimental applications of a real-time, multi-site interactive and collaborative environment called Distributed Immersive Performance (DIP). The objective of DIP is to develop the technology for live, interactive musical performances in which the participants - subsets of musicians, the conductor and the audience - are in different physical locations and are interconnected by very high fidelity multichannel audio and video links. DIP is specific r ...

**Keywords:** information interfaces and presentation, music performance, real-time interaction, remote collaboration

17 Embedded video in hypermedia documents: supporting integration and adaptive control

Dick C. A. Bulterman

October 1995 **ACM Transactions on Information Systems (TOIS)**, Volume 13 Issue 4

**Publisher:** ACM Press

Full text available: pdf(2.41 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

As the availability of digital video becomes commonplace, a shift in application focus will occur from merely accessing video as an independent data stream to embedding video with other multimedia data types into coordinated hypermedia presentations. The migration to embedded video will present new demands on application and support environments: processing of any on piece of video data will depend on how that data relates to other data streams active with ...

**Keywords:** adaptive control, embedded video, hypermedia documents, multimedia, synchronization, video presentation

18 Pervasive computing: Modeling service-based multimedia content adaptation in pervasive computing

Girma Berhe, Lionel Brunie, Jean-Marc Pierson

April 2004 **Proceedings of the 1st conference on Computing frontiers**

**Publisher:** ACM Press

Full text available: pdf(691.71 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Pervasive computing applications allow users to access information from anywhere while traveling and using variety of devices. Heterogeneity and limitation of resources involved in this application demand adaptation of content according to the current context (device, user, network etc.). The dynamic nature of adaptation mechanisms together with emerging opportunities of Web Service technology provides new approach of adaptation which is service-based. While this approach would provide a valuable ...

**Keywords:** content adaptation services, media transformation, multimedia content delivery, pervasive computing

19 Principled design of the modern Web architecture

Roy T. Fielding, Richard N. Taylor

May 2002 **ACM Transactions on Internet Technology (TOIT)**, Volume 2 Issue 2

**Publisher:** ACM Press

Full text available: pdf(335.47 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The World Wide Web has succeeded in large part because its software architecture has been designed to meet the needs of an Internet-scale distributed hypermedia application. The modern Web architecture emphasizes scalability of component interactions, generality of interfaces, independent deployment of components, and intermediary components to reduce interaction latency, enforce security, and encapsulate legacy systems. In this article we introduce the Representational State Transfer (REST) arc ...

**Keywords:** Network-based applications, REST, World Wide Web

20 A Parallel Implementation of 4-Dimensional Haralick Texture Analysis for Disk-Resident Image Datasets

Brent Woods, Bradley Clymer, Joel Saltz, Tahsin Kurc

November 2004 **Proceedings of the 2004 ACM/IEEE conference on Supercomputing**

**Publisher:** IEEE Computer Society

Full text available:  pdf(386.59 KB) Additional Information: [full citation](#), [abstract](#)

Texture analysis is one possible method to detect features in biomedical images. During texture analysis, texture related information is found by examining local variations in image brightness. dimensional (4D) Haralick texture analysis is a method that extracts local variations along space and time dimensions and represents them as a collection of fourteen statistical parameters. However, the application of the 4D Haralick method on large time-dependent 2D and 3D image datasets is hindered by ...

## 21 [Design and realization of an interactive multimedia server in education](#)

K. Coninx, B. Daems, F. Van Reeth, E. Flerackers

June 1997 **ACM SIGCSE Bulletin , Proceedings of the 2nd conference on Integrating technology into computer science education ITICSE '97**, Volume 29 Issue 3

**Publisher:** ACM Press

Full text available: pdf(663.09 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The European project ELECTRA is concerned with the introduction of multimedia / telematics support to enhance the accessibility (local, regional and international) of learning material and to promote collaborative work. For the purpose of this paper we concentrate on two workpackages the Limburg University Centre. The Interactive Multimedia Server workpackage focuses on the design of a generic platform for the integration of different types of information related to the learning process. Spec ...

## 22 [Digital preservation: A semi-automated digital preservation system based on semantic web services](#)

Jane Hunter, Sharmin Choudhury

June 2004 **Proceedings of the 4th ACM/IEEE-CS joint conference on Digital libraries**

**Publisher:** ACM Press

Full text available: pdf(357.74 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper describes a Web-services-based system which we have developed to enable organizations to semi-automatically preserve their digital collections by dynamically discovering and invoking the most appropriate preservation service, as it is required. By periodically comparing preservation metadata for digital objects in a collection with a software version registry, potential object obsolescence can be detected and a notification message sent to the relevant agent. By making preservation so ...

**Keywords:** digital preservation, semantic web services

## 23 [Digital libraries: Directions for hypertext research: exploring the design space for interactive scholarly communication](#)

John J. Leggett, Frank M. Shipman

August 2004 **Proceedings of the fifteenth ACM conference on Hypertext and hypermedia HYPERTEXT '04**

**Publisher:** ACM Press

Full text available:  pdf(1.42 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper is a "call to arms" for the community to take up Van Bush's original challenge of effecting a transformation of scholarly communications and record keeping. It argues for the necessity of an interactive scholarly communication research agenda by briefly reviewing the development of alternative authoring and publishing models. Seven dimensions of interactive communication that delineate a design space for the area are described. Previous work and existing new media are used to in ...

**Keywords:** digital libraries, institutional repositories, interactive fiction, interactive narrative, interactive scholarly communications, new media, storytelling engines

## 24 Building and using cultural digital libraries: Supporting access to large digital oral history archives

Samuel Gustman, Dagobert Soergel, Douglas Oard, William Byrne, Michael Picheny, Bhuvana Ramabhadran, Douglas Greenberg

July 2002 **Proceedings of the 2nd ACM/IEEE-CS joint conference on Digital libraries**

**Publisher:** ACM Press

Full text available:  pdf(734.60 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper describes our experience with the creation, indexing, and provision of access to a ve large archive of videotaped oral histories - 116,000 hours of digitized interviews in 32 language: from 52,000 survivors, liberators, rescuers, and witnesses of the Nazi Holocaust. It goes on to identify a set of critical research issues that must be addressed if we are to provide full and detailed access to collections of this size: issues in user requirement studies, automatic speech recognition, ...

**Keywords:** cataloging, oral history, research agenda

## 25 Q focus: mobile applications: Mobile media: making it a reality

Fred Kitson

May 2005 **Queue**, Volume 3 Issue 4

**Publisher:** ACM Press

Full text available:  pdf(528.08 KB) 

[html\(31.52 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Two prototype apps reveal the challenges in delivering mobile media services.

## 26 Optimizing document format: Two diet plans for fat PDF

Thomas A. Phelps, Robert Wilensky

November 2003 **Proceedings of the 2003 ACM symposium on Document engineering**

**Publisher:** ACM Press

Full text available:  pdf(198.98 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

As Adobe's Portable Document Format has exploded in popularity so too has the number PDF generators, and predictably the quality of generated PDF varies considerably. This paper survey range of PDF optimizations for space, and reports the results of a tool that can postprocess existing PDFs to reduce file sizes by 20 to 70% for large classes of PDFs. (Further reduction can often be obtained by recoding images to lower resolutions or with newer compression methods such as JBIG2 or JPEG2000, bu ...

**Keywords:** PDF, compact PDF, compression, multivalent

## 27 GML, Interoperability, and Standards: WMS and GML based interoperable web mapping

system

Shashi Shekhar, Ranga Raju Vatsavai, Namita Sahay, Thomas E. Burk, Stephen Lime  
November 2001 **Proceedings of the 9th ACM international symposium on Advances in geographic information systems**

**Publisher:** ACM Press

Full text available: pdf(1.65 MB)

Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

Recently the World Wide Web has become a popular vehicle for information distribution and web-based geographic information system (GIS) are rapidly evolving and adapting to these new environments. The main hindrance for building true interoperable distributed geographic information systems is the lack of any standard exchange mechanism between the diverse GISs connected over the web. Recent efforts by the OpenGIS Consortium have resulted in several specifications to alleviate these problems. ...

**Keywords:** DOM, DTD, GIS, GML, SAX, WMS, XML Schema, XSLT

28 Community design of DLESE's collections review policy: a technological frames analysis

Michael Khoo

January 2001 **Proceedings of the 1st ACM/IEEE-CS joint conference on Digital libraries**

**Publisher:** ACM Press

Full text available: pdf(194.46 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this paper, I describe the design of a collection review policy for the Digital Library for Earth System Education (DLESE). A distinctive feature of DLESE as a digital library is the "DLESE community", composed of voluntary members who contribute metadata and resource reviews to DLESE. As the DLESE community is open, the question of how to evaluate community contributions is a crucial part of the review policy design process. In this paper, technological frames theory is used ...

**Keywords:** content analysis, decision making, design, digital library, ethnography, peer review technological frames

29 Efficient and flexible Web access to art-historical image collections

Matthias Wagner, Stefan Holland, Werner Kießling

March 2000 **Proceedings of the 2000 ACM symposium on Applied computing - Volume 2**

**Publisher:** ACM Press

Full text available: pdf(646.03 KB)

Additional Information: [full citation](#), [references](#), [index terms](#)

**Keywords:** Web access, applications in the arts and humanities, format optimization, image databases, multimedia delivery

30 Characterizing a national community web

Daniel Gomes, Mário J. Silva

August 2005 **ACM Transactions on Internet Technology (TOIT)**, Volume 5 Issue 3

**Publisher:** ACM Press

Full text available: pdf(364.77 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This article presents a characterization of the community Web of the people of Portugal. We defined criteria for delimiting this Web based on our past experience of crawling pages related to Portugal and collected over 3.2 million documents from 46,000 sites satisfying those criteria. Our characterization was derived from this crawl. We describe the rules that we established for defining the boundaries of this community Web and the methodology used to gather statistics.

Statistics cover the numb ...

**Keywords:** Portuguese Web, Web characterization, Web communities, Web measurements

31 On proxy agents, mobility, and web access

Anupam Joshi

December 2000 **Mobile Networks and Applications**, Volume 5 Issue 4

**Publisher:** Kluwer Academic Publishers

Full text available:  pdf(201.52 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

With the emerging need for ubiquitous access to information, web access from mobile clients is gaining increasing importance. Unfortunately, the underlying protocols of the web are not designed to support operations from a resource poor platform in a low bandwidth, disconnector prone environment. Efforts to create systems to support mobile browsing have typically been proxy&dash;based. However, such solutions have recently been criticized due to their non&dash;scalability. Developments in ad ...

32 The case for persistent-connection HTTP

Jeffrey C. Mogul

October 1995 **ACM SIGCOMM Computer Communication Review , Proceedings of the conference on Applications, technologies, architectures, and protocols for computer communication SIGCOMM '95**, Volume 25 Issue 4

**Publisher:** ACM Press

Full text available:  pdf(1.68 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The success of the World-Wide Web is largely due to the simplicity, hence ease of implementati of the Hypertext Transfer Protocol (HTTP). HTTP, however, makes inefficient use of network and server resources, and adds unnecessary latencies, by creating a new TCP connection for each request. Modifications to HTTP have been proposed that would transport multiple requests over each TCP connection. These modifications have led to debate over their actual impact on users, servers, and on the net ...

33 Ubiquitous hypermedia: Integrating the web and the world: contextual trails on the move

Frank Allan Hansen, Niels Olof Bouvin, Bent G. Christensen, Kaj Grønbaek, Torben Bach Pedersen, Jevgenij Gagach

August 2004 **Proceedings of the fifteenth ACM conference on Hypertext and hypermedia HYPERTEXT '04**

**Publisher:** ACM Press

Full text available:  pdf(3.41 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper presents applications of HyCon, a framework for context aware hypermedia systems The HyCon framework encompasses annotations, links, and guided tours associating locations a RFID- or Bluetooth-tagged objects with maps, Web pages, and collections of resources. The use created annotations, links and guided tours, are represented as XLink structures, and HyCon introduces the use of XLink for the representation of recorded geographical paths with annotatic and links. The HyCon archi ...

**Keywords:** SVG, XLink, context aware hypermedia, open hypermedia

34 The VuSystem: a programming system for visual processing of digital video

C. Lindblad, D. Wetherall, D. Tennenhouse

October 1994 **Proceedings of the second ACM international conference on Multimedia**

**Publisher:** ACM Press

Full text available:  pdf(808.12 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In computer-participative multimedia applications, the computer not only manipulates media, but also digests it and performs independent actions based on media content. We present a design approach that applies the programming techniques of visualization systems to the development of computer-participative multimedia applications. We describe an implementation based on this approach, and report performance measurements that demonstrate it is practical. We conclude describing three applications ...

35 An architectural approach to building systems from COTS software components

Mark R. Vigder, John Dean

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

**Publisher:** IBM Press

Full text available:  pdf(253.02 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

As software systems become increasingly complex to build developers are turning more and more to integrating pre-built components from third party developers into their systems. This use of Commercial Off-The-Shelf (COTS) software components in system construction presents new challenges to system architects and designers. This paper is an experience report that describes issues raised when integrating COTS components, outlines strategies for integration, and presents some informal rules we have ...

36 Trustworthy 100-year digital objects: durable encoding for when it's too late to ask

H. M. Gladney, R. A. Lorie

July 2005 **ACM Transactions on Information Systems (TOIS)**, Volume 23 Issue 3

**Publisher:** ACM Press

Full text available:  pdf(1.04 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

How can an author store digital information so that it will be reliably intelligible, even years later when he or she is no longer available to answer questions? Methods that *might* work are not good enough; what is preserved today should be reliably intelligible whenever someone wants it. Prior proposals fail because they generally confound saved data with irrelevant details of today's information technology---details that are difficult to define, extract, and save completely and accurately ...

**Keywords:** Long-term digital preservation, encoding

37 Industrial sessions: big data: The SDSS skyserver: public access to the Sloan Digital Sky Survey data

Alexander S. Szalay, Jim Gray, Ani R. Thakar, Peter Z. Kunszt, Tanu Malik, Jordan Raddick, Christopher Stoughton, Jan vandenBerg

June 2002 **Proceedings of the 2002 ACM SIGMOD international conference on Management of data**

**Publisher:** ACM Press

Full text available:  pdf(1.48 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The SkyServer provides Internet access to the public Sloan Digital Sky Survey (SDSS) data for both astronomers and for science education. This paper describes the SkyServer goals and architecture. It also describes our experience operating the SkyServer on the Internet. The SDSS data is public and well-documented so it makes a good test platform for research on database algorithms and performance.

38 Ontologies: A lightweight ontology repository

Jin Pan, Stephen Cranefield, Daniel Carter

July 2003 **Proceedings of the second international joint conference on Autonomous agents and multiagent systems**

**Publisher:** ACM Press

Full text available:  pdf(380.24 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Multi-agent systems rely on shared ontologies to enable unambiguous communication between agents. An ontology defines the terms or vocabularies used within messages encoded using an agent communication language (ACL). In order for ontologies to be shared and reused, ontology repositories are needed to store and maintain ontologies. The Otago Ontology Repository is a prototype implementation of a design to allow ontology designers and agents to use open Web standards to publish and retrieve ontol ...

**Keywords:** multi-agent systems, ontology repository

39 Managing the software design documents with XML

Junichi Suzuki, Yoshikazu Yamamoto

September 1998

**Proceedings of the 16th annual international conference on Computer documentation**

**Publisher:** ACM Press

We present a new approach for modeling multi-modal data sets, focusing on the specific case of segmented images with associated text. Learning the joint distribution of image regions and words has many applications. We consider in detail predicting words associated with whole images (auto-annotation) and corresponding to particular image regions (region naming). Auto-annotation might help organize and access large collections of images. Region naming is a model of object recognition as a process ...
